

SAP Business ByDesign

Turn your growth potential into real results with SAP Business ByDesign

The challenges of a growing business

Is your mid-sized business facing growing pains? Are you looking for a way to run more efficiently, have more transparency across your business, and help align your business processes and departments to work seamlessly together? Do you want to generate comprehensive business analytics and insights and create a single, consistent source of data throughout your business? Do you want an enterprise resource planning (ERP) solution that is fully scalable to meet your needs as your business continues to grow and is managed from the cloud so you can have access to everything you need anywhere on any device? Do you need an ERP solution that maximizes profits and provides a solid return on investment, while still fitting in your budget with no surprise costs on the back end?

If so, SAP Business ByDesign may be the solution you're looking for.

Introducing SAP Business ByDesign

SAP Business ByDesign is a cloud-based ERP solution that unifies your core functions in an end-to-end business suite by providing a single business application to manage every aspect of your business. It is a modular solution, so you can choose what you need to start and build from there. It has extensive capabilities right out of the box but is also fully customizable for your business's specific needs. Some of the modules of SAP Business ByDesign include:

- Accounting and finance
- Human resources
- CRM
- Supply chain management
- Purchasing, inventory, and distribution
- Business insights

It is designed to be comprehensive, flexible, and fully scalable, so you can make it fully your own and have it scale effortlessly as your business grows. The single application provides a single source of truth for data across your business, so the most up-to-date information is always at everyone's fingertips. It includes powerful business analytics and insights, so you can see at a glance what needs to be done. All of this in a cloud-based ERP, so you can access the information you need anytime, anywhere, from any device.

And with SAP Business ByDesign's subscription-based pricing, there are no surprises about costs so you can always manage your budget effectively.

Built to fit and grow with your company

Scalability: SAP Business ByDesign scales from 20 to 10,000 users and allows you to easily re-configure processes, so you can add more employees as business grows. You'll keep data moving across your company even as your company grows and changes.

Globalization: With customers in more than 100 countries and globalization and translation toolkits built on local best practices, SAP Business ByDesign provides the agility to adapt to tax requirements, languages, and currencies for quick entry to new markets.

Flexibility: SAP Business ByDesign is extensible and adaptable to meet your specific business needs.

Seamless integrations: Connect yourself to the systems you use today and what you may need next, featuring APIs that allow quick connections to custom solutions you've built as well as pre-built integrations with Office 365, Concur, SAP Analytics Cloud and SAP SuccessFactors.

Always up to date: Quarterly product updates so that you always have the latest features and processes, along with a development roadmap so you know exactly what's coming next.

No surprise costs: With SAP Business ByDesign's subscription-based pricing, so you can be confident in your budget, knowing there are no surprises and no extra costs.

Work how you want, wherever you want

SAP Business ByDesign is a cloud-based solution, meaning that you can access your information anytime, anywhere.

- A natively mobile, cloud-based solution
- Easy-to-use user experience that fits the way your employees want to work
- Every part of the web-based solution is responsive, adapting to whatever mobile devices your employees use to get their work done
- Targeted apps designed specifically for day-to-day tasks like time and expense reporting, project management, and analytics

The cloud-based solution means simplicity for you: no hardware, no maintenance, no need for additional IT staff to maintain it. Everything is delivered as a managed service from the cloud, so all your information is at your fingertips, whenever and wherever you need it. And with over 10 years of experience running ERP in the cloud, SAP Business ByDesign provides a stable solution with a proven track record of delivering for businesses like yours. So you can focus on what you do best: growing your business.

Better analytics means better decisions and quicker responses

SAP Business ByDesign builds analytics into every process, so you can see and share accurate, up-to-date information across functions and departments. This gives your team the full insights they need to confidently make informed, in-the-moment decisions.

Each specific role has its own dashboard, giving users an easy, clear view of the metrics that matter most to them. The dashboard shows them the issues and opportunities that require their attention so they can easily see what needs to be done and take action quickly.

With more than 500 standard reports, dozens of pre-built KPIs and Excel integration all right out of the box, SAP Business ByDesign provides more transparency to your business and gives your team the tools they need to easily analyze and share data.

[Client]
